GOELST® FURNITURE AND FIXTURES FOR INSTITUTIONAL CLIENTS.

Goelst® products are used as modular lab or pharmacy equipment and offer furniture solutions for areas such as offices, patient rooms, reception counters, nurses' stations and so on. This makes the product ideal for standards programs that need one system for furniture, equipment, and built-ins. Our products are covered by a comprehensive 10-year limited warranty and consists of over 78,000 items such as cabinets, work surfaces, counters, wardrobes, lockers, desks, tables, bookcases, lab-cores, etc. Goelst® is moveable, reconfigurable, and is depreciated as furniture under MACRS rules (= accelerated, in 7 years). Having one standard that applies to so many areas ensures that the product truly can be moved from area to area, and from storage back to active use, greatly enhancing the likelihood that items will be reused, rather than sitting in a warehouse somewhere, never to be used again. Or worse yet, via the trash dumpster to the landfill. Commitment to reusable products is one of the most immediate and meaningful "green statements" an institution can make.

Imagine all of this with one furniture system!

Office Systems

[Goelst® truly does it all.]

HEALTHCARE

In the healthcare arena Goelst truly does it all, from the patient registration desk, to the cashier's area, and everything in between.

Goelst® products are successfully used in such diverse spaces as offices, mail rooms, break rooms, labs, pharmacies, clinics, operating rooms, emergency rooms, retail stores, libraries, locker rooms, and many other types of spaces. They provide modular solutions as work stations, storage systems, mail sorters, kitchen cabinets, lab benches, pick stations, exam and procedure room cabinets, instrument storage, triage desks, nurses' stations, checkout counters, teller lines, study carrels, lockers, a near infinite variety of tables, and many other special needs.

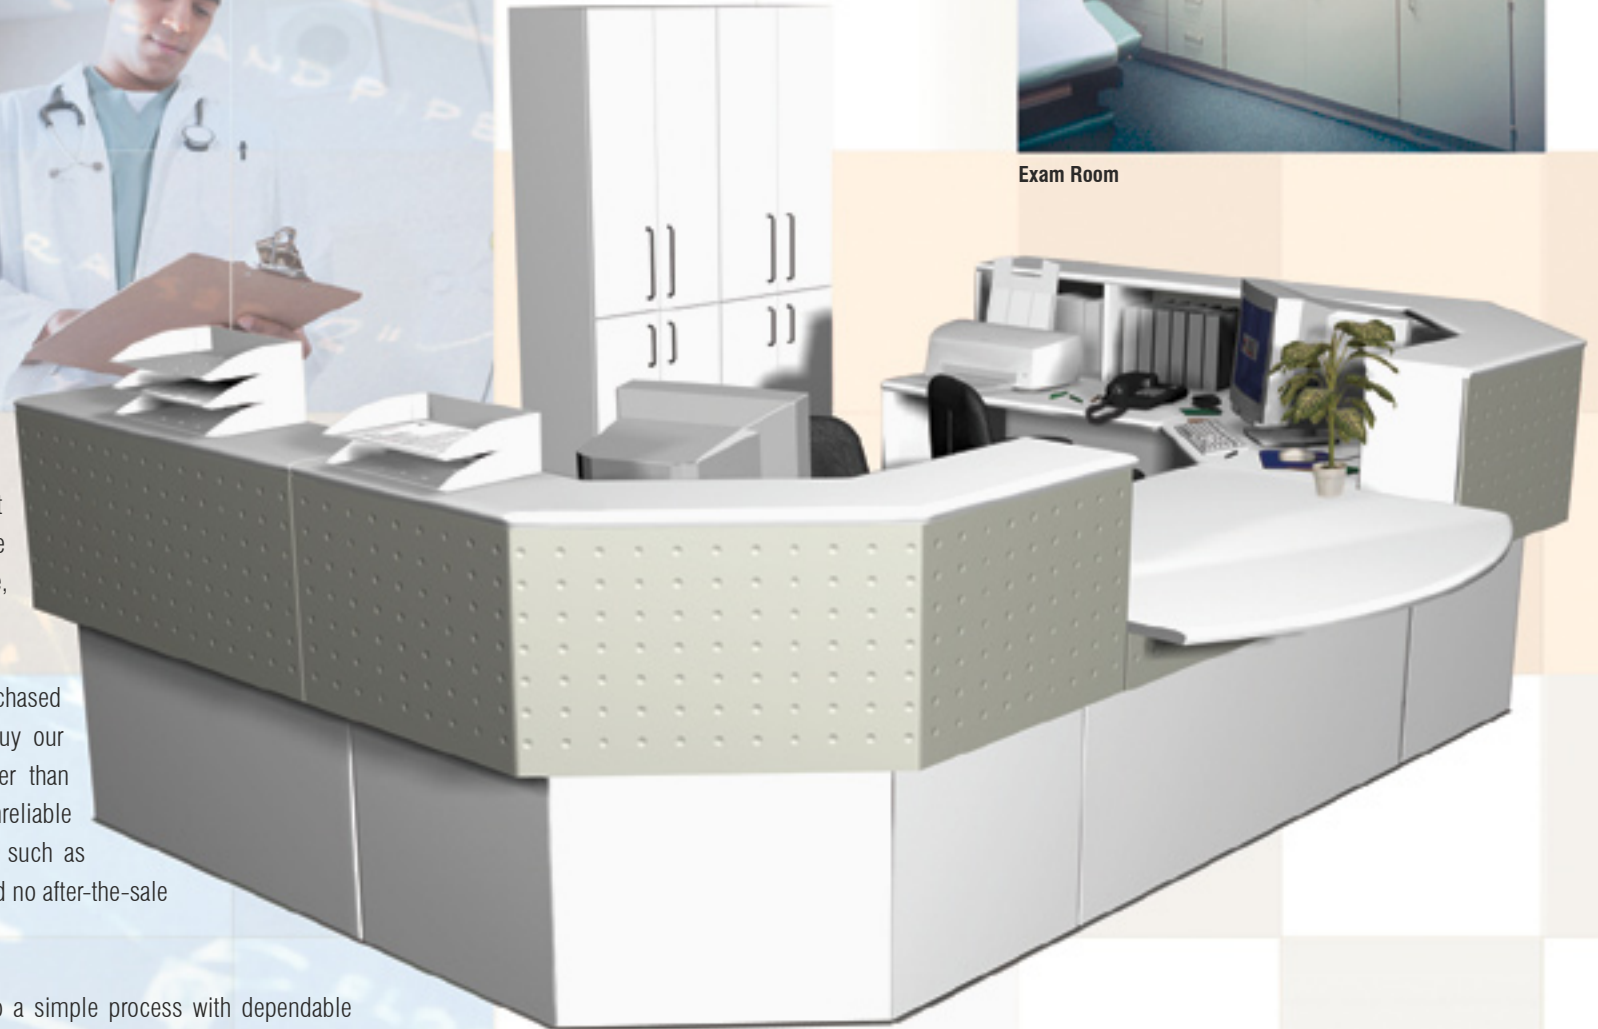

The sheer breadth of the product line allows facilities to set one standard for furniture, equipment and built-ins, and in one fell swoop make all these items and areas modular, moveable, reconfigurable, interchangeable and depreciable as furniture.

Goelst® simplifies the process of acquisition and can be purchased through a variety of contracts. Our process allows you to buy our products directly from a reliable furniture manufacturer, rather than having them included in the inherently inefficient and unreliable construction process. Goelst makes time consuming issues such as bidding, shop drawings, nonperformance, 90-day warranties and no after-the-sale service things of the past!

Goelst® products make what was once a nonstop hassle, into a simple process with dependable partners, top-notch quality, and terrific consistency in delivery, price, and service.

EDUCATIONAL & GOVERNMENT

Goelst® is a phenomenal solution for institutional clients who deal with multiple locations, need super quick delivery, high quality, and want the flexibility of a modular approach. Designed as a furniture system, the Goelst® product allows rapid installation and terrific aesthetics, both for public areas and “back room” areas.

Goelst® offers many catalog solutions to clients in areas that typically require custom products. With an immense array of custom and near custom finishes, the product is capable of creating a unique and distinct visual identity for each client application. It also maintains the ability to be moved, reconfigured, and added onto with a huge assortment of standard and, if need be, custom items.

When the product is used in leased space, it can be removed at the end of the lease and moved to the new space to be used in either the same or a completely different configuration. The government customer uses Goelst in applications from offices to service counters to mail rooms and storage spaces. The entire Goelst product line of 78,000 plus items is available from UNICOR, on one single GSA schedule, as well as on many state prison industry and local government contracts. The product has been successfully used in facilities as varied as courthouses, penitentiaries, State, County and VA hospitals, research labs, drivers license offices, police stations, and military barracks, in a variety of uses, ranging from office casegoods and reception stations to parachute and helmet lockers and mobile finger print stations.

Students Science Lab Table

For the educational market, Goelst has solutions for a variety of spaces as well. The product lends itself equally well for classroom, back room, and office applications alike. Some areas of use are a variety of labs, mail rooms, break rooms, storage spaces, and refreshment centers. The product is widely used for private faculty offices, desking systems, counters of all types, conference room furniture, training tables, filing systems, and modular, stackable storage walls. In other words, the product’s use is only limited by the imagination!
